

23. (Withdrawn) The system of Claim 21 wherein each of the plurality of user events pertains to municipal bonds.
24. (Withdrawn) The system of Claim 23 wherein the filter is configurable by the user.
25. (Withdrawn) The system of Claim 21 wherein the filters comprise:
- an event filter for determining whether a specific non-user event should be provided to the user; and
  - a correlation filter for determining whether specific user events should be correlated with the specific non-user event.
26. (Withdrawn) The system of Claim 25 wherein the event filter comprises the correlation filter.
27. (Withdrawn) The system of Claim 21 further comprising a means for a user to effectuate a trade via the user interface.
28. (Withdrawn) The system of Claim 27 wherein the trade is automatically reported to the Municipal Securities Rules Board.
29. (Original) A computer-implemented system for assisting in the trading of municipal bonds comprising:
- a central processor unit for receiving event data relating to at least one of the group consisting of municipal bond offers, bids, bids wanted and trades;
  - a filter subsystem in communication with the central processor unit for defining a filter including characteristics of events to be identified; and
  - an event subsystem in communication with the central processor unit for applying the filter to identify events having the characteristics,
- wherein the identified events having the characteristics can be made available for use in the trading of municipal bonds.
